Objective

With One year of dedicated web development learning and the successful completion of a web development course, as well as a 2-month teamwork project, I'm passionate about using cutting-edge technology to create seamless user experiences I aim to continuously learn and grow, collaborating with my skills.

Skills

Expertise: HTML | CSS | JavaScript (ES6) | ReactJS | TailwindCSS | Bootstrap
Comfortable: NodeJS | ExpressJS | MongoDB | JWT
Familiar: Redux
Tools: Git version control | Chrome Dev Tools | Figma | Netlify | Vercel | Firebase || Ui/Ux Design || RestApi
Interpersonal: Communication, Team Work, Hardworking, Time Management, Problem-Solving, Creativity.

Projects

1. Plan Picker (Team Project)
- During a two-month team project, I collaborated to develop a Calendly website.
- We developed a real-time, modern, and user-friendly website for scheduling and appointments.
- Challenges Feature: Admin Dashboard, Event, Scheduling, Calendar, Service, Availability etc.

Technology: ReactJS, Redux, TailwindCSS, NodeJS, ExpressJS, MongoDB, Firebase and JWT
Client-Side || Server-Side || Demo

2. MAS-Sports-Academy (Mern Stack)
- Dashboard specification (Admin, Instructor, and User)
- Instructors can add classes with pending status. When an admin approves the classes, it will show the classes page. The user can select the class.
- Admin Can approve or deny the classes. Admin also manages all users.

Technologies: TailwindCSS, React, MongoDB, Express. js, Vercel, Firebase, Jwt, AxiosSecure
Client-Side || Server-Side || Demo

3.MASter Recipe House (Mern Stack)
- To see View Recipe log in first. Without Login, you can't see the recipe.
- After viewing the recipe add your favorite at one time
- Firebase Authentication for login and register page and make pdf of Blog page

Technologies: TailwindCSS, React, MongoDB, Express. js, Vercel, Firebase
Client-Side || Server-Side || Demo
